The Story of Red King Delicious

Brauns Variety Delicious

(U. S. Plant Patent Number 1411)

Red King, the new, proven Red Delicious sport, was discovered at Riverside, Washington, by E. Barclay Brauns. The original limb is located on the low side of a Starking variety Red Delicious tree in an area where the fruit would normally lag behind the rest of the tree in color. Yet for the past fourteen years this sport limb has consistently produced fruit which colored ten days to two weeks earlier than the rest of the fruit on the parent tree.

Mr. Brauns has several second generation trees which were grafted from the original sport limb. These trees are producing full crops of fruit. He also has over fifty acres of third, fourth, and fifth generation trees from one to nine years of age located at Riverside in Okanogan County and Entiat in Chelan County (Entiat is 90 miles south of Riverside). Over two carloads of apples were harvested this year from both locations.

All of the fruit produced (including second, third and fourth generations) has shown the same early coloring characteristics that are found on the sport limb of the parent tree. In size, shape, and bearing ability the Red King Delicious is very similar to its parent. Storage tests for the past two years indicate that Red King Delicious has very good keeping ability.

Due to the great demand we are sold out of Red King Delicious for the 1956-1957 season. We are now booking orders for delivery in the Fall of 1957 or the Spring of 1958.

RED KING DELICIOUS

(Plant Patent No. 1411) Brauns Variety Delicious

THE PROVEN

EARLY COLORING RED DELICIOUS SPORT

RED KING DELICIOUS

Champion of the New Red Sports

- ★ More fruit of Red King is now produced than all other new Red Delicious sports combined.
- ★ More Red King trees are being planted than any other new Red Delicious sport.

PLANT THE BEST — PLANT RED KING

RED KING IS SOLD ONLY BY VAN WELL NURSERY

APPLES

SUMMER APPLES

- **EARLY MCINTOSH**—Large fruit, crimson color, juicy white flesh.
- **CRIMSON BEAUTY**—Very early with brilliant red color. Ideal summer apples.
- **LODI**—Improved Yellow Transparent, yellow color.
- **RED JUNE**—Good quality, summer apple, red color.
- **YELLOW TRANSPARENT**—Crisp white flesh, excellent for pies and apple-sauce.
- **JEFFRIES**—Crimson color, rich flavor, ideal for home orchard.

FALL AND WINTER APPLES

- **RED GRAVENSTEIN**—Fall apple, improved red strain.
- **GRAVENSTEIN**—Fall apple, yellow striped with red.
- **RED MCINTOSH**—Improved McIntosh, finer color.
- **MCINTOSH**—Now planted as a winter resistant understock. Well known for its hardiness.
- **DOUBLE RED JONATHAN**—The finest, new improved Jonathan sport. Large, early coloring apple, deep red color, second to none.
- **JONATHAN**—Original favorite for cooking and eating, striped red color.

➤ **DOUBLE RED DELICIOUS**—Early coloring, red all-over color. A star producer everywhere apples are grown.

APPLES (Continued)

Introducing the **Barkley Red Rome**

(Patent applied for)

Originated at Manson, Washington, by George L. Barkley and introduced by Van Well Nursery. This apple is as new as a morning sunrise. It produces larger, better colored fruit. Be the first to plant this sensational, new apple.

Geo. L. Barkley

BARKLEY RED ROME (Patent Applied for)—New Red Rome apple. More color, larger size, a heavy bearer, and an excellent keeper. This apple won all first-place ribbons in Rome Beauty class at the First Annual Apple Show of the Washington State Horticultural Association in 1952 when it was shown for the first time. (See center pages of this catalog for color photos of this remarkable new apple.)

ROME BEAUTY—Common Rome, fine cooking apple.

VAN WELL RED WINESAP (Ruble Strain)—An improved Red Winesap, fine quality apple endorsed by many Washington fruit growers as best of all Red Winesaps.

Ross Heminger, East Wenatchee grower and shipper, inspecting Van Well's improved Red Winesap at the Washington State Horticultural Association's Apple Show. This better coloring apple won first-place ribbons in the Winesap division in 1952 and 1953.

APPLES (Continued)

WINESAP (Common Winesap) — Good keeper and shipper, a heavy bearer. Long time favorite of commercial fruit growers.

YELLOW NEWTON (Newton Pippin) — Excellent cooking apple, light yellow color.

YELLOW DELICIOUS — Large yellow apple, waxy golden color. Fine flavor. Very profitable market apple. Well known as a pollinizer.

These apple trees are an example of the nursery stock grown at our nurseries on the Nile Tract in East Wenatchee. Our trees are grown on virgin soil. We use the most modern sprinkler system for controlled irrigation. Modern methods, combined with years of experience in growing nursery stock, enable us to furnish our customers with the finest fruit trees obtainable anywhere.

CRAB APPLES

HYSLOP—Large, dark red or purplish, good keeper.

TRANSCENDENT—Large, red and yellow, excellent for apple jelly.

HIBERNAL—Hardy winter resistant understock for top working. Used in areas where winter injury is a problem.

Our healthy, vigorous trees are propagated right, grown right, and delivered to you in perfect growing condition.

PEARS

➤ **BARTLETT**—Best commercial canning pear on the market. Large, smooth fruit, with golden yellow color.

NEW! DIFFERENT! . . . MAX-RED BARTLETT PEAR
(*Plant Patent No. 741*)

New all-red pear, similar to Bartlett, except for beautiful red skin.

**Max-Red
Bartlett**

(U. S. Plant Patent)

- **FLEMISH BEAUTY**—Large, red blush, heavy bearer.
 - **ANJOU**—Leading commercial variety. Firm pear, well known for its keeping qualities.
 - **COMICE**—Dessert pear, buttery, juicy, sweet.
 - **SECKEL**—Sweet, juicy, brown with red cheek.
 - **BOSE**—Large, cinnamon russet, long neck. High quality.
 - **FORELLES**—Long keeper, fine for table decoration, lasts all winter.
-

Early Elberta Peach

Our own
bud selected strain.

APRICOTS

- YAKIMENE—Very early, fine flavor.
- PERFECTION—One of the finest of the new commercial apricots. Very large.
- WENATCHEE (Wenatchee Moorpark)—Very large commercial apricot. Fine producer, self pollenating.
- BLLENHEIM—Good canner, excellent quality.
- TILTON—Fine flavor, excellent canner, productive.
- MOORPARK (California)—Large, round apricot, orange cheek.

PEACHES

- MAYFLOWER—Very early, white flesh, semi-cling.
- DIXIRED—Early, flesh and skin yellow, red blush, attractive appearance, semi-cling.
- REDHAVEN—One of the earliest peaches with yellow flesh. Firm, fine textured, sweet, and of good quality. Redhaven is one of the finest new peaches developed in a good many years. Freestone. See colored picture of Redhaven on last page.
- GOLDEN JUBILEE—Early yellow freestone, good bearer, excellent canning peach.
- ROCHESTER—Freestone, a good producer in areas west of Cascades. Very hardy, thrifty grower, deep yellow and red.
- SLAPPY—Fruit yellow, good bearer, excellent flavor. Favorite home canning peach. Freestone.
- HALEHAVEN—A very hardy and thrifty tree, good bearer and shipper. A cross between J. H. Hale and South Haven. Yellow freestone, large, high red color, fine flavor.
- VETERAN—Yellow flesh, a very high quality fruit for freezing and canning. An early producer. Freestone.

PEACHES (Continued)

✓ **EARLY ELBERTA** (Improved Elberta)—Has large fruit, golden yellow color, excellent canner and shipper, freestone.

✓ **ELBERTA**—The peach that sets the standard by which all varieties are judged. Rich, yellow color, highly blushed with red. Self pollenizing and a pollener for other varieties. Excellent commercial canning peach, large fruit, fine shipper. Freestone.

J. C. Cozart, Orondo, Washington orchardist, shows the remarkable growth made by a two year old peach tree in his orchard. Mr. Cozart says, "The combination of Van Well Nursery Stock and excellent care gives me thrifty early bearing trees. I am very well satisfied with the quality stock and good service I get from the Van Well Nursery."

✓ **J. H. HALE**—One of the finest commercial peaches on the market today. Large, round, uniform fruit. Excellent shipper. Always brings top price on market. Freestone.

✓ **LATE CRAWFORD**—Good flavor, fine home canner. Freestone.

✓ **ORANGE CLING**—Large yellow fruit, excellent canner, clingstone.

✓ **OCTOBER KRUMMEL**—Very late peach, good flavor, freestone.

Our healthy, vigorous trees are propagated right, grown right, and delivered to you in perfect growing condition.

CHERRIES

Peter Van Well, owner and manager of Van Well Nursery, inspecting a block of cherry trees in our nurseries. All operations of the Van Well Nursery are under his personal supervision. The Van Well Nursery co-operates fully with the inspection program of the Washington State Department of Agriculture in the selection of trees from which seed and scion wood is obtained.

- BLACK TARTARIAN—Black cherry, used extensively as a pollenizer.
- ROYAL ANN—Yellow with red blush, good canner.
- DEACON—Black cherry, slightly smaller than Bing. Excellent pollenizer.
- VAN—Recent introduction from Canada. Black cherry, excellent quality.
- BING—Large, black, solid, highest quality, productive. The leading commercial variety of the sweet cherries.
- BLACK REPUBLICAN—Medium size, black, good keeper and shipper, good pollenizer.
- LAMBERT—Large black commercial cherry. A good shipping variety—hardy and vigorous.

Photo at right shows Cherry tree planted in a young orchard. This tree was planted by orchardist in April. Photograph was taken the following September. This is a good example of the quality stock sold by Van Well Nursery.

(Cherries Continued)

INTRODUCING THE NEW BARKLEY RED ROME

Barkley Red Rome is a new and different Red Rome. It is a mutation of Rome Beauty discovered by George L. Barkley in his orchard at Manson, Washington.

Mr. Barkley has producing trees of the second generation, and the Rome Beauty tree with its original sport limb is growing and producing in his orchard. In addition to these trees of the second generation Mr. Barkley has 23 trees of the third generation. These trees produced a total crop of 548 packed boxes of fruit in 1953. The inspection certificate issued jointly by the USDA and the Washington State Department of Agriculture on the packout of this crop shows that the apples were "mostly 90% to 100% good red." Trees of both the second and third generation continue to show the same characteristics of better colored and larger fruit that make the original sport limb so outstanding.

The fruit of Barkley Red Rome has consistently shown better color and size than other Red Romes in the Barkley orchard, and other orchards in the same area. Storage tests have indicated that this new apple has exceptional keeping qualities. The apple starts coloring with a stripe and gradually fills in until it colors fully, the stripes remaining prominent even when the fruit has attained full color. The shape of Barkley Red Rome tends to be longer than Rome Beauty or other Red Romes. Tree structure and ability to bear are very similar to Rome Beauty.

This new apple was introduced publicly for the first time at the first annual apple show of the Washington State Horticultural Association at Yakima, Washington, on December 8, 9, and 10, 1952. At that time it was awarded all of the first-place ribbons in Rome competition.

Mr. Barkley has applied for a United States patent on this new apple, and has chosen the VAN WELL NURSERY as exclusive propagators and distributors of this sensational new Red Rome.

BARKLEY RED ROME

is sold only by

VAN WELL NURSERY . . . WENATCHEE, WASHINGTON

BARKLEY RED ROME

- MORE COLOR
- LARGE SIZE
- HEAVY BEARER
- GOOD KEEPER

The Barkley Red Rome was awarded all first-place blue ribbons at the first annual apple show of the Washington State Horticultural Association at Yakima, Wash., Dec. 8, 1952.

BARKLEY RED ROME

is sold only by

VAN WELL NURSERY . . . WENATCHEE, WASHINGTON

CHERRIES (Continued)

- ✓ MONTMORENCY—Bears young. Fruit clear red with sweet acid flavor. One of the best sour cherries.
- ✓ MAY DUKE—Hardy, early, ideal for pies.
- ✓ LATE DUKE—Sour pie cherry, ripens late July. Large dark red fruit.

The Van Well Nursery cooperates fully with the inspection program of the Washington State Department of Agriculture in the selection of trees from which seed and scion wood is obtained.

PRUNES

- ✓ SUGAR—Large, sweet, fine for canning or drying, purple color.
- ✓ EARLY ITALIAN—Excellent commercial variety, ten days to two weeks earlier than Italian, large purple fruit. A good shipper.
- ✓ HUNGARIAN—Dark red, good keeping qualities.
- ✓ DOUBLE X FRENCH (Improved Petite)—Large, sweet.
- ✓ STANLEY—Purple skin, golden flesh. Firm, excellent quality. Can be counted on to produce heavy crops every year.
- ✓ ITALIAN—One of the finest prune varieties. Dark purple color. Heavy bearer. Good for drying and canning. Fine shipper.

PLUMS

- ✓ BEAUTY—Largest of early plums, oval shape, crimson color, ten days earlier than Santa Rosa.
- ✓ CLIMAX—Large, bright red, fine shipper.
- ✓ SHIRO—Early, bright yellow, good quality.
- ✓ PEACH PLUM—Light red skin, large, round, ideal for home orchard.
- ✓ YELLOW EGG—Large, golden color, juicy, good canner, showy market variety for fruit stands.
- ✓ SANTA ROSA—Very large, round, dark red, flesh yellow streaked with crimson. As a shipping plum it has few equals.
- ✓ DUARTE—Red flesh, large, sweet, good quality.

NECTARINES

- ✓ BOSTON RED—Deep yellow with bright blush, sweet.
- ✓ QUETTA—Good quality, large, yellow-green color.

QUINCES

- ✓ PINEAPPLE—Very large, apple-shaped, flavor resembles pineapple. Delightfully fragrant when fresh and delicious when cooked.
- ✓ ORANGE—Large, round, bright yellow, an old favorite, finest quality.

NUT TREES

Some of each variety should be planted for proper pollenization.

ALMONDS

✓ I.X.L.—4 to 6 feet	\$1.40
✓ TEXAS PROLIFIC—Pollenizer, 4 to 6 feet	1.40

FILBERTS

✓ DAVIANA—Pollenizer, 4 to 6 feet	\$1.40
✓ DU CHILLY—4 to 6 feet	1.40

WALNUTS

✓ FRANQUETTE—4 to 6 feet (Grafted)	\$3.00
✓ KIRK SEEDLING—Pollenizer, 4 to 6 feet	2.25

All scion wood used for propagation by the Van Well Nursery is selected from commercial orchards and plantings from trees that have the best variety characteristics, hardiness, vigor, and productiveness.

DWARF AND SEMI-DWARF FRUIT TREES

Apples and Pears grown on our Hardy DWARF trees are as large, well colored and full of flavor as fruits grown on standard trees. These DWARF trees can be grown on a small lot! These DWARF trees bear very soon after planting, often in the second year. By proper pruning DWARF trees can be grown successfully when planted as close as 8 feet by 8 feet.

✓ DWARF PEAR TREES

BARTLETT—Beautiful, large and flavorful pears for canning or eating.
 ANJOU—This excellent dessert pear can be grown in very little space in your backyard.

✓ DWARF APPLE TREES

Our DWARF apple trees are grown on imported East Malling Number IX rootstocks.

RED DELICIOUS—Early coloring, double red, excellent for eating.

YELLOW DELICIOUS—Beautiful golden color, wonderful for cooking, eating or canning.

RED JONATHAN—Has Jonathan's rich, spicy, tangy flavor and all-red color.

YELLOW TRANSPARENT—Early apple, yellow color, crisp and juicy fruit.

GRAVENSTEIN—Fall apple, yellow striped with red, rich flavor.

McINTOSH—Crimson color, crisp white flesh, tasty and juicy.

✓ SEMI-DWARF APPLE TREES

On East Malling II rootstock

YELLOW DELICIOUS—

McINTOSH—

DOUBLE RED DELICIOUS—

On East Malling VII rootstock

YELLOW DELICIOUS—

DOUBLE RED DELICIOUS—

These SEMI-DWARF trees, while they are not small as true dwarfs, are not as large as standard trees. Growers should be able to care for these trees without using large ladders. These SEMI-DWARF trees are rather new and as yet we do not know of any large plantings in bearing.

GUARANTEE

We guarantee all nursery stock sold by us to be true to name. If any stock sold by us shall prove untrue to name we will replace free or refund purchase price, at the option of the purchaser.

We guarantee our trees to be in first class, live condition when they leave our packing house. Due to conditions beyond our control, soil, weather, etc., we cannot guarantee growth. We will, however, replace any trees that fail to live, at one-half of the original purchase price. All complaints for failure of trees to grow must be made in writing within six months of the date of delivery.

MAIL ORDERS FILLED PROMPTLY

Order with confidence from Van Well Nursery. We ship only first quality stock.

SALES TAX

Residents of the State of Washington please add 3% Sales Tax when ordering Planters' Accessories. No tax necessary on Fruit Trees.

SHIPPING

Our shipping season is from November 15 to June 1. All orders received after June 1 will be held until the following fall.

We pay all shipping charges (except as noted in price list) on orders of \$10.00 or more to all points in Washington, Oregon, and Idaho. Orders to other points in United States and Canada are F.O.B. Wenatchee.
